Note:

- CS3 system should be in learned state before going online.

4. Known Issues

- CS3 Conferencing System:
    - Multiple microphone stations can have their microphone opened, if there is any switch between workflows without closing the application.
    - Chairman could initiate voting while voting is in progress
    - Delegates could speak while voting is in progress.
- CS5 Conferencing System:
    - Dip switch settings in VUDU for "Allowed to Speak" & "Allowed to Vote" shall not be overridden from the application.

5. Steps to Install ConferControl application.

For a new installation of the software, launch **ConferControl Setup.exe.** As part of the installation process, below mentioned components will be getting installed:

- VC++2012 redistributable package

- FTDI driver

- ConferControl v3.6 application

NOTE: Microsoft .NET 4.5 framework needs to be pre installed before installing the application.

6. Steps to Uninstall ConferControl application.

- Navigate to the control panel.
- Navigate to Programs --> Programs and Features --> Uninstall a program.
- Select the file ConferControl 3.6 in the list of installed programs.
- Click on Uninstall button.

The above process, will be removing ConferControl 3.6 version from the PC/laptop. However, to complete the un installation process, delete the complete directory which is present in the mentioned path as **\\Program Files (x86)\AKG\ConferControl 3.6**

NOTE: Above process, even makes the database file also to get deleted. If you wish you backup all your data for future use, kindly back up the directory as mentioned here, which is **\\ProgramData\AKG\ConferControl 3.6.0.0**
