

## Model

# CS650 Series Combination VC and Selector Switch

Combination volume control and selector switch in one unit features a 50W auto transformer on the left side of a two-gang wall plate and a six-source selector switch on the right.

### Features

- 50W volume control for use with 70V or 25V speaker lines provides 33dB attenuation in 10 steps. The last two steps before "Off" are 6dB (33dB total). UL Listed. Wiring connections are plug-in screw terminations for prewire convenience.
- Six-source selector switch is two-pole, non shorting rotary style to assure complete isolation between lines. Connections are Euro-style screw terminals allowing the unit to be field connected for use together or independently.
- Includes a standard or decorator style two-gang wall plate. Decorator models also include two single-gang plates for separate location mounting.
- The device with two-gang wall plate measures 4.562"W x 4.5"H x 2.125"D and is made to install into a two-gang or 4" square E.O. box with mud ring (not included).
- Knob and mounting screws included.

### A&E Specifications

The combination volume control / source selector switch shall be Lowell Model \_\_\_\_\_. The volume control shall be a UL Listed 50W auto transformer for use with 70V or 25V speaker lines and shall provide a total of 33dB attenuation in 10 steps (the last two steps before "off" shall be 6dB). The six-source selector switch shall be two-pole, non shorting rotary style for isolation between lines. Wiring connections shall be to screw terminals allowing the unit to be field connected for use together or independently. The wall plate style shall be \_\_\_\_\_ (standard, decorator) with \_\_\_\_\_ (white, black, stainless steel, stainless steel & white, stainless steel & black) finish. The device shall install in a two-gang or 4" square E.O. box with mud ring (not included).
