

Product Overview:

Perfect for on-the-go systems or as a backup option, the ListenTALK AAA Battery Compartment allows you to quickly and easily convert receivers for use with AAA alkaline batteries when needed. Keeping battery compartments available ensures that your customers and clients will be able to take advantage of your assistive listening system even when fully charged battery packs or charging cords are not available.

Highlights:

- Direct fit for ListenTALK transceivers
- Allows for use of standard AAA alkaline batteries
- Perfect for extended use or when charging facilities are not available
