

## MUSICASS6 6 Zone Speaker Selector

### FEATURES

- Automatic Impedance Matching and On/Off Push Button Control
- Dual Amplified Source Switching Capability
- Control Six Speaker Pairs in Multi Room or Surround Sound Applications
- Compact, Low Depth size is perfect for shelf or rack mounting

### GENERAL DESCRIPTION

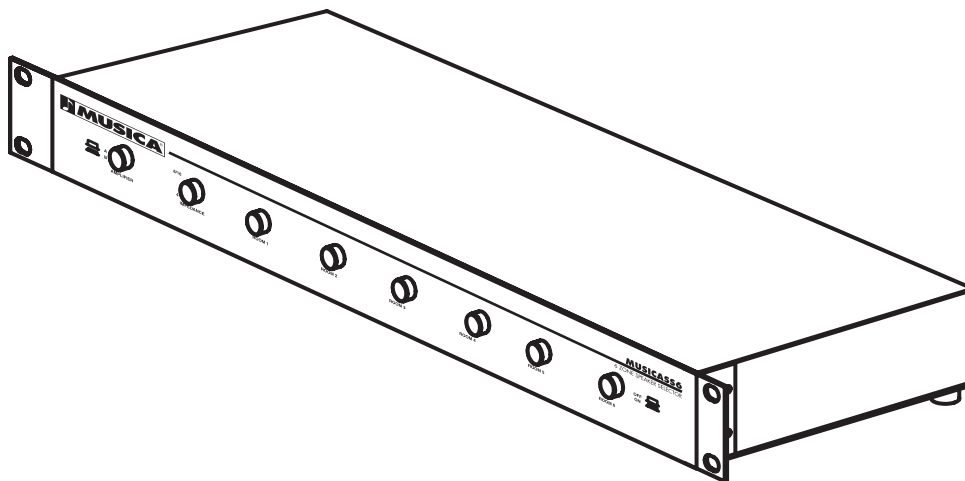

The MUSICASS6 includes an impedance protection circuit that operates in pairs, allowing each set of loudspeakers to operate directly and simultaneously from the amplifier for maximum efficiency. The left and right channels are completely isolated for protected operation. It can be shelf or 19" rack mounted with supplied brackets. MUSICASS6 features screw tight type terminals that will facilitate 12 to 24 gage wire, push button on/off controls for each connection, and attractive mar-resistant black finish.

The MUSICASS6 provides for switching control of up to six loudspeaker pairs and will accommodate any combination of 8 and/or 16 ohm loudspeakers. It also features a switch for safe connection of 4 ohm loudspeakers, and includes separate on/off controls for each loudspeaker pair and on A-B source selector switch for overall system control. Loudspeaker volume can be adjusted individual room volume controls such as the MUSICAVC-50Z(not included).

### SPECIFICATIONS

Speaker Capacity	6 pair
Power Handling	120 Watts Peak Music
Wire Capacity	12 to 24 ga.
Dimensions	17"W x 1 5/8"H x 5 7/8"D (431.8mm x 41.3mm x 149.2mm)

\* Per channel, 8 ohm load, single room (measured @ 50Hz continuous)
