

Model No. LV-5K potentiometer

Potentiometer control with 5000 ohm impedance provides economical volume level adjustment in systems with low power circuits.

Features

- 5W audio power rating
- 5000 ohm impedance
- For application with constant voltage 25V, 70V, or 100V loudspeaker systems
- Continuous attenuation (no stop at minimum or maximum)
- Ships mounted to one-gang stainless steel wall plate (2.75"W x 4.5"H) with stamped and filled dial scale
- Fluted black knob
- Mounting screws
- Assembled in the U.S.A. with global components

A&E Specifications

The potentiometer control with 5000 ohm impedance shall be Lowell Model LV-5K. It shall include a one-gang stainless steel wall plate with dial scale (0-10), fluted knob, and mounting screws. It shall feature continuous attenuation (no stops).

Model Summary

| Model No. | Power Rating | Type | Attenuation | Impedance | Wall Plate Height | Wall Plate Width |
|-----------|--------------|---------------|-------------|-----------|-------------------|------------------|
| LV-5K | 5W audio | potentiometer | continuous | 5000 ohm | 4.5" | 2.75" |
