701-AB Activator Buttons

701-AB Activator Buttons

Specifications: 701-AB Activator Buttons Mounting hardware included

701-AB Activator Buttons

Description

The 701-AB Activator buttons are normally-open or normally-closed circuit activator buttons made from durable ABS plastic. They are video-arcade tough, and mount into any 3/4" thick substrate. Installation is simple, and only requires drilling a 1 1/8" diameter hole. 16 or 18 gauge speaker wire is needed to connect buttons to sound source. The 701-AB Activator Buttons are available in red (item # AB-701-R), white (item # AB-701-W), or black (item # AB-701-B).The 701-AB Activator buttons are normally-open or normallyclosed circuit activator buttons made from durable ABS plastic. Patented SoundTube Technologies

SoundTube and MSE Audio Group constantly develop new technologies that enhance audio product performance. SoundTube innovations are protected by multiple U.S. and international patents, which explicitly cover SoundTube dispersion, enclosure and dome technologies. MSE Audio Group actively defends its patents in order to protect SoundTube resellers and end users.

Technical Data and Specification Tools

Technical Data

SoundTube Entertainment strives to provide complete and effective technical information and data to dealers, engineers and designers. All data are available from SoundTube Entertainment or at www.soundtube.com. Technical data and downloads include: EASE[™] data – 3-D polar plots. EASE[™] Address – 2-D modeling for distributed systems Autodesk® Revit® software Tech Sheets – Technical information and architectural specs for system engineers SoundTubeSPEC[™] – Proprietary speaker placement software

Data Acquisition and Verification

All data for SoundTube speakers are independently collected from and verified by NWAA Labs (www.nwaalabs. com) using their proprietary MACH testing system. All data are collected and analyzed according to ASTM, ISO and AES standards using EASRA, TEF and MLSSA. Full balloon data including both phase and magnitude are compiled into a variety of formats including EASE 4.x, GLL and CLF.
