

## STRATEGICALLY HIDDEN LOUDSPEAKER

The Strategically Hidden Speaker is designed to blend into the aesthetic of any ceiling while retaining optimal sound performance. Ideally suited for sound masking, background music, and paging applications, the SHS comes in a variety of form-factors and mounting options to fit any environment.

### Strategically Hidden

Unique, hidden design blends into any ceiling without compromising architectural aesthetic

FEATURES/BENEFITS -

## Self Contained

Self contained unit includes speaker, enclosure, and mounting system

### Adaptive Dispersion Lens

Patented waveguide with user selectable Adaptive Dispersion Lenses up to 130°

#### Optional Color Match Process Via DesignLab™

AtlasIED's optional DesignLab<sup>™</sup> color match process aben provides visual continuity in all ceilings. Custom match the color and blend the texture of any ceiling

### Multiple Lens Options

Three included lens configurations allow for various applications and ceiling heights

#### Easy Installation

SHS speakers are simple to install in-ceiling, on-wall, or as a pendent to fit any location

### Hide the SHS In Virtually Any Ceiling

DesignLab™ by AtlasIED is a custom print process that takes the SHS from well-hidden to completely camouflaged in virtually any ceiling. Using an incredibly accurate UV-printer, AtlasIED is able to match colors and patterns so the SHS can blend into any environment.

### SHS-6T2

AtlasIED's SHS-6T2 Strategically Hidden Speaker, a 4.5" 2-way coaxial driver inside a concealed enclosure, provides high-definition sound. SHS-6T2 can be used in background music, paging, and sound masking systems. An integrated rail system, with adjustable tile rails built into the enclosure, requires no rail screws for installation.

### SHS-3T2

AtlasIED's SHS-3T2 Strategically Hidden Speaker, a 2.25" full range speaker with multiple mounting options (in-ceiling, wall/surface mount, or pendent mount), offers a compact design with minimal visual intrusiveness. SHS-3T2 is perfect for paging, background music, or sound masking applications. Additionally, when used with an AtlasIED Z-Series High-Definition Acoustical System, the speakers can be daisy chained to the Z-Series source unit using Cat5e cable.

### SHS-LF

The SHS-LF is a Strategically Hidden Sub-woofer designed to complement the sound quality of the SHS-6T2 and SHS-3T2 to provide low frequencies where high quality, full-spectrum audio is required. The SHS-LF is particularly suited for venues where hi-fidelity music is used to enhance guest experience. The SHS-LF uses the same rail system as the SHS-6T2, ensuring quick and easy installation.
