

VocoPro Digital-Conference-16

Product Name: Digital-Conference-16

Short Description: Sixteen Channel UHF Wireless Conference Microphone System

Long Description:

The Digital-Conference-16 is VocoPro's latest edition in quality and reliable microphone sets. It's a 16 channel wireless system configured with conference microphones. Operating in the 900MHz band, the Digital-Conference-16 is unaffected by TV broadcast interference that normally plagues other microphones on the market! Its professional quality 24-bit digital audio will be heard clearly across its entire 200ft range thanks to VocoPro's digital Mic-On-Chip™ technology and proven analog transmitter. The Digital-Conference-16 is show ready with a balanced XLR output for each channel, allowing for minute volume control; or patch in all the microphones quickly with the four ¼" mixed outputs. With 16 microphones available, accommodating even the largest groups will be a breeze! Simplify your microphone set up with the latest microphone package, the Digital-Conference-16 by VocoPro!
