

FOOTBALL STADIUM SOUND SYSTEM

WITH 3 COMMUNITY STADIUM SPEAKERS AND YAMAHA
POWERED MIXER WITH FEEDBACK SUPPRESSOR

INSIDE THE DESIGN

This permanent installation PA system for football fields is designed for small to medium middle school or high school stadiums with both home and visitor bleachers. When mounted to the press box, this system can cover from 30 to 30-yard line, with a crowd of over 750 people. This system provides strong and clear audio for play-by-play announcements, paging, recorded messages, and music entertainment during game day festivities where vocal clarity and coverage are essential.

SYSTEM FEATURES

- Superb intelligible speech for play-by-play and announcements
- Incredible background/foreground music reproduction
- Weather-resistant, compact, horn-loaded loudspeakers
- Portable 12-channel 2 x 710W powered mixer amplifier with feedback suppressor
- Handheld wireless microphone system with an operating range of 300'
- Ultra Clear handheld announcement mic with a quiet On/Off switch and desktop stand
