

GYM SOUND SYSTEM

4 FLYABLE HIGH-OUTPUT ELECTRO-VOICE 15" SPEAKERS,
BLUETOOTH & WIRELESS MICROPHONE

INSIDE THE DESIGN

This gym sound system is a powerful and versatile audio solution designed to meet the needs of most gymnasiums, athletic spaces, and practice facilities. With four flyable Electro-Voice ELX200-15 15" speakers and a Dynacord L1800FD amplifier, this gym speaker system provides superior sound. The 1200W commercial ELX200-15 speakers produce powerful audio up to 130 dB SPL each and will cover the entire crowd when hung in the center of your gymnasium. Only using one side of the gym? You can turn off certain speakers when needed to throw to one area or set of bleachers to not only reduce reflection/reverberation but to also be more efficient. With user-friendly controls, the ART MX622 mixer makes this system easy to operate and change settings as needed. You can also wirelessly stream audio from any Bluetooth enabled device with the Denon DN-300BR Bluetooth receiver.

SYSTEM FEATURES

- Powerful 1200W 15" loudspeakers that can be flown as a center cluster or spread out over the bleachers
- Easy to use 6-channel mixer with EQ and effects loop
- DSP power amplifier offers high-quality components and truly professional processing power and performance characteristics
- Crisp, clear wireless and wired microphones ideal for all-around voice applications
- Stream music wirelessly from your phone or tablet with the Bluetooth rackmount receiver - Range up to 100ft
