

The MIPRO MU-55LX is a dual ear omni-directional condenser lavalier microphone with a low profile 4.5mm capsule. It is ideal for applications that require clear and natural vocal audio. They are an excellent choice for theatrical performances, houses of worship, broadcast studios, performers, AV presenters and aerobics instructors. It is durable, compact and lightweight.

Designed primarily for wireless applications, the MIPRO MU-55LX is also suitable for applications requiring a wired condenser lavalier microphone when used with the optional MIPRO MJ-53 adaptor.

This omni-directional condenser lavalier microphone is rugged, reliable and offers the premium performance needed by today's audio professionals.

### MU-55LX Features

- Premium smooth, warm, open and natural vocal performance
- Subminiature omni-directional electret condenser
- Omni-directional pick-up pattern
- Waterproof
- Visually unobtrusive, durable and comfortable to wear
- High dynamic range and able to withstand 135 SPL without distortion
