

PURERESONANCEAUDIO[®]
PRIVACYCARD™ USB SOUND MASKING GENERATOR

PRIVACYCARD™ QUICK START GUIDE

Caution: Please read this manual carefully before operating.
Damage caused by misuse is not covered by the warranty.

INSTALLATION & OPERATION

- **STEP 1:** Open the case and remove the card.
- **STEP 2:** Gently press down on the top opening tab on the red side.
- **STEP 3:** The USB connection should fold up. Flip open the tab with the red side down.
- **STEP 4:** Insert into the USB slot on the media player on the left side of MA/RMA series mixer amplifier.
- **STEP 5:** After a moment, the Pure Resonance Audio mixer amp should detect a signal from the USB and switch to the USB input on the media player. You should see the play clock running.
- **STEP 6:** To adjust the volume on the media player, press and hold the vol + or vol - button. It may be helpful to adjust the volume on the media player when blending masking with music.
- **STEP 7:** If desired, use the remote control to adjust the equalizer settings of the media player.
- **STEP 8:** Select the desired EQ setting of the media player and adjust the master volume and master EQ settings as desired for your chosen blend of masking/music.
- **STEP 9:** After 10 hours, the masking will reach the end of the drive. It will then automatically repeat to keep masking operating as continuously as possible.
