# POINTMAKER AUDIO PRESENTER™

## PRESENTATION SYSTEM - VP S2

The new Pointmaker Audio Presenter (VP S2) amps up your presentation possibilities. Like the Presenter, the Audio Presenter represents a new generation of wireless tools designed to simplify presentation creation and delivery via preferred devices (laptop, tablet or phone) in a meeting space. Audio Presenter then adds audio to the mix, delivering industry first, truly wireless, audio + video connectivity. With an integrated amplifier and audio mixer, Audio Presenter allows you to integrate your choice of professional microphones, loudspeakers and other pro audio components – and gives you the option to connect wireless personal devices such as computers, tablets, phones, headsets or anything Bluetooth® to the room's audio system. You can even extend the range up to 100 feet with the optional Bluetooth range extender. No more video without audio, or conference lines and speaker phones.
