

STADIUM PA SOUND SYSTEM

WITH 4 ELECTRO-VOICE WEATHER RESISTANT SPEAKERS,
WIRELESS HANDHELD MICROPHONE AND WIRED MICROPHONE

INSIDE THE DESIGN

This outdoor stadium PA system boasts high-output, full-range speakers designed to withstand all weather conditions, ensuring optimal performance whether mounted on the press box or strategically positioned to cover both the field and the stands. Delivering rich, full stadium audio and crisp vocals for play-by-plays and announcements, it incorporates advanced digital signal processing for enhanced sound quality. The system is complemented by an intuitive mixer, a high-quality wireless microphone, and comprehensive cabling, facilitating seamless installation and operation.
