Example below is of RS600i, tapped to low impedance mode

Low impedance/transformer-bypass mode: Match up the Ω symbol to both arrows (like shown above).

70V mode: Line up the desired tap setting with the arrow next to the 70V symbol

100V mode: Line up the desired tap setting with the arrow next to the 100V symbol

25V mode: Use the smaller red text on the 70V side and line up the desired tap setting with the arrow next to the 70V symbol
