

TSL115 Active Loudspeaker with Circular LED Array

We've taken our incredibly popular and successful 15-inch, 800-watt TS115A Active Loudspeaker, and added excitement and capability of built-in interactive LED lighting.

There are countless small- to medium-sized events where top-quality PA/DJ sound and celebratory lighting are needed: backyard weddings, graduation parties, karaoke contests, pool parties, coffee house performances, recitals, reunions, anniversary observations and more. In every one of these situations, large, expensive, complicated stacks of equipment and lighting are both inappropriate and unnecessary. Alto Professional's TSL115 powered speaker fulfills all your requirements with an easily-transportable, easy-to-set up unit.

The TSL115 combines Alto's signature sound with exciting lighting, turning an ordinary event into a memorable special occasion.
