

ANY SPOT TRAVELER 10

TV10

ALL INCLUSIVE PORTABLE PA SYSTEM

The Galaxy Audio TV10 Traveler is a battery or AC operated portable PA system. The Traveler is designed for people who need portable, lightweight, "all in one" PA systems that allow for a quick and uncomplicated setup. This compact system features a 10" woofer, 1" horn, 150-watt amplifier, and can be configured in a variety of ways to meet your specific needs. Features of the standard Traveler include 4 Inputs: XLR, 1/4", RCA, & 1/8" each with its own volume control, a 2 Band EQ, and a Master Volume Control. Audio Outputs include a dual RCA Line Out and a 1/8" line out. The durable ABS enclosure features a convenient carry handle and a provision for standard pole mounting. The TV10 has a retractable handle and durable wheels for easy mobility.

The Traveler has a unique "plug in" modular design, which allows optional Function Modules to be easily added or removed. Optional Modules include Single and Dual Wireless Mic Receivers (with Handheld, Pendant, Headset, Pendant & Lapel options), Bluetooth® receiver, multiple media players and Audio Link Module which wirelessly transmits the entire audio mix from one Traveler to any number of satellite Travelers. Since all the Modules are internally wired, no external patching is necessary.

The Universal Power Supply/Battery Charger allows the Traveler to be used anywhere in the world. The Traveler will operate for an unlimited time on AC power and approximately 6 hours on battery power. If a power failure occurs when operating on AC, the Traveler will seamlessly switch over to battery power. A full recharge of the batteries is approximately 4 hours. The Traveler may be operated while recharging the batteries without affecting the charge time.

BATTERY OPERATED WIRELESS SPEAKER

* A Limited 90 Day Warranty Applies to Rechargeable Batteries
