# PowerShare Adaptable Power Amplifiers

## PowerShare Technology: Define Your Power

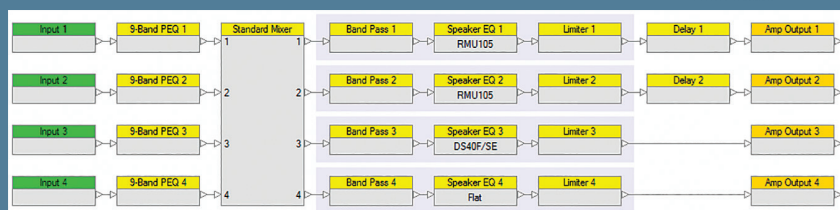

- Patented PowerShare technology shares 600 W across all outputs
- Define your power — Any output handles up to 600 W
- Ideal for multi-zone applications with differing power needs

## Load-Independent Outputs

- Each output supports Low-Z (4–8 Ω) or Hi-Z (70/100V)
- Ideal for mixed-load applications

## Integrated Loudspeaker Processing and PowerShare Editor Software

- PowerShare Editor software offers additional loudspeaker processing
- Rear-panel EQ dials recall ten Bose loudspeaker EQs per channel, for basic setups without a PC
- Eliminates the need for an external signal processor in many applications

## ControlCenter CC-1 Zone Controller Accessories

- 3 regions, 2 colors, 6 total CC-1 varieties
- CC-1 zone controllers can be directly attached to PowerShare amplifiers
- Adjust zone levels without an additional signal processor
