WILLIAMS SOUND

OVERVIEW

· Allows for one- or two-way communication between single or multiple groups, with the exception of the Language Interpretation Mode (one-way only)

· Global use – 2.4 GHz harmonized for use in most countries

· Lightweight. Sleek design. Simple-to-use.

· Neckloop compatible to accommodate hearing aids

· ADA compliance and assistive listening in one package

· Promotes interaction – Full-duplex capability; (DLT transceiver) supports up to six simultaneous talkers

· DLR receiver supports unlimited listeners

· Maintains focus – Crystal-clear digital sound quality

· Completely Portable – No base station or rack-mounted components required

· Secure – 87-bit encryption, PIN code and frequency-hopping technology

· Flexible – Pre-packaged and fully customizable options available

· Inclusive — Range is up to 200 feet outdoors / 300 feet indoors
