TRUE WIRELESS SELF-CONTAINED FULL DUPLEX COMMUNICATION

Ultralite PRO16 all-in-one wireless link **up to 16 users in full duplex without a base station**. Lightning-fast microprocessor provides **two channels** of simultaneous talk hands-free communication, allowing separate groups to speak privately. **Connect your entire crew in full duplex conference with the touch of a button.**

SPECIALTY RF TECHNOLOGY PROVIDES INTERFERENCE FREE TALK

Engineered with a technology known as **Active Frequency Hopping**, the Pro16 monitor the surrounding environment and automatically switch channels to avoid interference. Operating range **over ½ mile line of sight**.

ENGINEERED TO PROVIDE CLEAR AUDIO & ALL-DAY COMFORT

Eartec's **noise cancelling** auto mute microphone silences the signal when the boom is set UP. The Mic assembly features internal metal construction and stainless attachment hardware. The **new deluxe ear pad** is extra wide, soft and weather resistant. Large capacity Lithium Polymer batteries provide **a run time of up to 10 hours**.
