

PRELIMINARY TECHNICAL DATA

ArenaMatch Utility AMU208

small-format foreground/fill loudspeaker

Product Overview

Built for zone-fill coverage or high-SPL foreground music, Bose ArenaMatch Utility loudspeakers feature similar tonal balance to ArenaMatch array modules but in compact designs. They have the same EMB2S compression driver as ArenaMatch arrays, ensuring consistent sound, and the same IP55 weather rating. Deploy them for zone-fill coverage in sports stadiums, arenas, outdoor entertainment centers, and more. Or use them to provide intelligible, high-level sound in any outdoor area — from niche venues such as breweries and fairgrounds to larger settings like resorts and outdoor shopping centers.

The AMU208 is a small-format ArenaMatch Utility model for outdoor applications that require excellent audio from compact loudspeaker. It provides wide, even coverage with a 90° x 60° constant-directivity high-frequency horn, 70 Hz – 18 kHz frequency response, 126 dB peak SPL, and supports the lowest vocal ranges with two Bose LF8 8-inch woofers.

Key Features

Deploy as zone-fill to support ArenaMatch arrays systems, delivering powerful, intelligible sound and ensuring consistent tonal balance with EMB2S compression drivers in every speaker

Deploy to provide high-level foreground music in any outdoor venue

Install outdoors with an IP55 weather rating, three-layer stainless steel grille, water-resistant woofer cone coating, industrial polyurethane exterior coating, and molded cover to protect inputs

Adapt to a variety of configurations — all models ship standard with 70/100V transformer inputs and passive crossover with optimized filters for more consistent frequency and polar response

Streamline the design process by combining with complementary Bose Professional products, such as PowerMatch amplifiers and ControlSpace DSPs

Mount easily with included stainless-steel U-bracket; rear enclosure panel also includes M8 threaded inserts to accept third-party accessory mounting brackets

Provide wide, even coverage with 90° x 60° constant-directivity high-frequency horn, which can be rotated for horizontal or vertical installation

Perform in the most demanding applications with 70 Hz – 18 kHz frequency response and 126 dB maximum peak SPL **Support lowest vocal range** with 2x Bose LF8 8-inch woofers featuring a 2-inch extended-excursion voice coil, which extends response to 70 Hz

- Footnotes

 (1) Frequency response and range measured on-axis in anechoic environment with recommended bandpass and EQ.
 (2) Bose extended-lifecycle test using pink noise filtered to meet IEC268-5, 6-dB crest factor, 500-hour duration.
 (3) AES standard 2-hour duration with IEC system noise.
 (4) Sensitivity measured in anechoic environment with recommended bandpass and EQ.
 (5) Maximum SPL calculated using sensitivity and power ratings, exlusive of power compression.
