

Product Description

Conceived, engineered and built with precision in the United Kingdom, VXP Series represents the latest evolution of Tannoy's core philosophies in self-powered loudspeaker system design. The Tannoy VXP 8 features the brand new IDEEA™ (IntelliDrive Energy Efficient Amplifier) integrated power module from Lab.gruppen. The result is a highly compact, ultra-reliable and exceptionally efficient self-powered loudspeaker. VXP 8 offers a punchy and sonically superior solution for small-scale sound reinforcement as well as for critical-quality speech reproduction where clarity and natural vocal characteristics are paramount. The VXP 8 has been sonically matched with the wider range of VXP Series models, this allows consistency in installations where a mix of products is utilised.

The VXP 8 is built around a single 200 mm (8") Dual Concentric™ driver mounted in an ultra-compact, rugged birch plywood cabinet with aesthetically profiled edges and an Airnet™-backed, powder-coated steel grille. The latest version of Tannoy's exclusive point source, constant directivity Dual Concentric drive unit ensures high sensitivity and exceptional efficiency. More than 60 years of research into Dual Concentric technology allows this unique configuration to deliver exceptionally smooth beam-width characteristics resulting in an even coverage pattern at all frequencies aiding predictable system design. Symmetrical dispersion characteristics enhance loudspeaker placement flexibility, allowing vertical or horizontal mounting of single or multi-cabinet arrays without compromising sound quality.

The perfectly matched Lab.gruppen IDEEA integrated power module efficiently and effectively handles the demands of both fixed installation and portable audio. IDEEA modules are designed for superlative audio performance, robust power output and long-term durability – even with extended duty cycles up to round-the-clock operation. Extensive features to safeguard internal circuits and connected drivers ensure a long and trouble-free service life. At the heart of the IDEEA module is a patented Class D output stage capable of high power levels with very low distortion and minimal current draw – all with a net operating efficiency in excess of 80%. A universal switching power supply accepts any mains voltage from 70 – 265 V (+/- 10%) at 50 Hz or 60 Hz through the appropriate IEC cord. In Auto mode, the speaker turns on with signal present and switches to standby mode after 20 minutes of no input, with standby power consumption of less than 1 W. Manual control mode allows the speaker to be turned on and off as required. A switchable 90 Hz high-pass filter tailors response for use with a subwoofer.

Rear panel connections are provided for audio input (XLR-F), audio link (XLR-M) and AC power (Neutrik® powerCON®). VXP 8 is available in black or white textured paint finish as standard, with matching grilles, and is also available in custom matched RAL colours as an option.

Features

- 200 mm (8") Dual Concentric full-range driver
- Well defined 90 degree dispersion for optimum coverage and forward gain
- Peak output of 120 dB
- Integrated Lab.gruppen IDEEA module providing ultra-reliable Class D amplification
- Versatile mounting via optional custom-designed hardware
- Pole-mountable for small-scale portable PA applications
- Exceptional sound and performance for a cabinet of this size
- Rugged and highly compact birch plywood enclosure
- Available in black or white textured paint finish; custom colours optional
- XLR input and link, powerCON mains (included)

Applications

- Theatres, Auditoria and Houses of Worship
- Small scale PA and compact voice reinforcement
- Bars and infill for nightclubs
- Portable and installed corporate AV
- Theme parks and leisure venues
- Gymnasiums and small/medium sports arenas

TANNOY®

TECHNICAL SPECIFICATIONS

Loudspeaker	VXP 8		
Frequency response (-3 dB) ⁽¹⁾ Full-range mode	80 Hz - 35 kHz		
Frequency range (-10 dB) ⁽¹⁾ Full-range mode	67 Hz - 45 kHz		
Frequency response (-3 dB) ⁽¹⁾ Hi-Pass mode	120 Hz - 35 kHz		
Frequency range (-10 dB) ⁽¹⁾ Hi-Pass mode	100 Hz - 45 kHz		
Dispersion (-6 dB)	90 degrees conical		
Driver complement	1 x 200 mm (8") constant directivity Dual Concentric™		
Crossover	Passive 1.7 kHz with dynamic HF protection		
Directivity factor (Q)	6.8 averaged 1 kHz to 10 kHz		
Directivity index (DI)	7.9 dB averaged 1 kHz to 10 kHz		
Rated maximum SPL ⁽²⁾	114 dB (average) 120 dB (peak)		
Distortion			
10% Full Power (8.94 V)	2nd Harmonic	3rd Harmonic	
250 Hz	0.12%	0.15%	
1 kHz	0.23%	0.84%	
10 kHz	1.35%	0.16%	
1% Full Power (2.83 V)	2nd Harmonic	3rd Harmonic	
250 Hz	0.16%	0.14%	
1 kHz	0.09%	0.53%	
10 kHz	0.53%	0.17%	

Construction

Enclosure	16.3 litre, 15mm (0.62") birch plywood, vented and internally braced.
Finish	Textured black or white paint, with custom colours on request. Powder-coated perforated steel grille, Airmet cloth behind.
Connectors	1 x female XLR (input), 1 x male XLR (link), 1 x Neutrik powerCON
Controls & indicators	Level Control Power LED (Blue) Signal LED (Green) Limit/Protect LED (Red) Full Range / HighPass Switch (110 Hz) Power Mode Switch Power Switch
Fittings	2 x M10 Flying inserts, 2 x M10 yoke bracket inserts (6 mm allen key), Blanking plate for optional VTH pole mount
Dimensions	388 x 280 x 275 mm (HxWxD) 15.3 x 11 x 10.8" (HxWxD)
Net weight	10 kg (22 lbs)

Shipped weight	21.5 kg (47.4 lbs)
Packed quantity	2
Amplifier	
Maximum input signal for clip	Input attenuator at Maximum: +4.5 dBu (Hard clip will occur at +14.5 dBu input signal)
Dynamic range	106 dB
Efficiency	> 90%
Damping factor	> 400 ref 8 ohms at 1 kHz
Distortion	< 0.05% @ 1 kHz -3 dB output (22 kHz bandwidth)
Input impedance	10 kohm unbalanced, 20 kohms balanced
Damping factor	> 400 ref 8 ohms at 1kHz
Distortion	< 0.05% @ 1 kHz -3 dB output (22 kHz bandwidth)

Protection systems

Over current	Output current limiter, always active
Clip limiter	Output voltage clip limiter, always active
Temperature	Over temperature causes protective mute
Brownout	Automatic protection and recovery
Mains	Inrush current limiter
Indicators	1x Power LED, 1x Signal LED, 1x Limit LED (Power LED: Red = Standby, Green = On, Yellow = Temperature protection active)

Amplifier type	Inherently bridged, globally modulated, high performance single channel Class D.
----------------	--

PSU specifications

Input connector	Locking Neutrik powerCON
Voltage selection	Universal mains input
Type	High efficiency, regulated switch mode power supply
Efficiency	> 85% typical
Input voltage	100 Vac-240 Vac +/- 10%, 50-60 Hz +/-10%
Mains fuse	Internal
Fuse type	3.15AT
Other features	Inrush current limiter
Standby power consumption	< 1 W
Idle power consumption	< 15 W
Maximum power consumption	300 W

Notes

(1) Average over stated bandwidth. Measured at 1 metre on axis in an anechoic chamber.

(2) Unweighted pink noise input, measured at 1 metre in an anechoic chamber.

A full range of measurements, performance data, and Ease™ Data can be downloaded at www.tannoy.com.

Tannoy is committed to a policy of continuous improvement through research and development. Though performance will equal or exceed published specifications, new materials or manufacturing processes could introduce variances. All figures are subject to change without notice. For critical applications, please confirm current specifications with your supplier or visit the Tannoy website at www.tannoy.com.

Architect's and Engineer's specifications

The loudspeaker shall consist of a 200 mm (8") full-range, point source Dual Concentric transducer. The low and high frequency elements shall be driven by an integrated single-channel Class D amplifier through an internal passive crossover network operating at 1.7 kHz. The amplifier module shall incorporate an auto power down (APD) circuit that places the loudspeaker in standby mode with less than 1 W power consumption when input signal is absent for more than 20 minutes, resuming full operation when signal is again present at the input.

Performance of the loudspeaker shall meet or exceed the following criteria: Frequency response measured at 1 metre on axis with swept sine wave shall be 88 Hz to 35 kHz (3 dB) in full range mode and 120 Hz to 35 kHz in high pass mode. Rated average SPL shall be 114 dB (anechoic) on axis at 1 metre. The dispersion of the loudspeaker shall be 90 degrees conical (-6 dB).

The enclosure shall be an optimally tuned 16.3 litre vented 15 mm (0.62") birch plywood cabinet. Connectors shall be 1 x female XLR (input), 1 x male XLR (link) and 1 x Neutrik powerCON. The speaker shall be fitted with the following controls and indicators: level control, blue power LED, green signal LED, red limit LED, full-range / high-pass switch (110 Hz) and a power switch. The enclosure shall be fitted with 4 x integral M10 inserts for flying hardware and 2 x M10 yoke bracket inserts. There shall be a blanking plate for an optional pole mount adaptor.

The enclosure shall not exceed the following dimensions: 388 x 280 x 275 mm or 15.3 x 11 x 10.8" (H x W x D). The loudspeaker shall be the Tannoy VXP 8.
