### Description

The Rockustics PunkRock is a premium 2-way outdoor loudspeaker solution for installations requiring high-performance sound in a design which matches the aesthetics of its environment. The PunkRock is designed for full-range back-ground/foreground music and paging. The sealed, onground enclosure is designed to withstand rain, frost, snow and ice.

### **Applications**

Its natural, weathered stone aesthetic makes the PunkRock an ideal choice for theme parks, promenades, playgrounds, shopping malls, restaurants, resorts, gardens and other outdoor applications. With a more compact design, the PunkRock is ideal for smaller areas. PunkRock speakers take advantage of an optional 64 Watt transformer (request prior to order) for use in commercial applications.

#### **Enclosure Technology**

All Rockustics cabinets are constructed from a non-polluting stone and resin compound. The cabinets maintain a natural aesthetic, weather and age naturally, and are an earth-friendly alternative to plastic construction. To ensure 100% water- and weatherproofing, all Rockustics products come as a sealed unit. Therefore, the inclusion of optional transformers must occur prior to completion by manufacturer.
