

Connect Almost Anything

In your school, church or meeting room

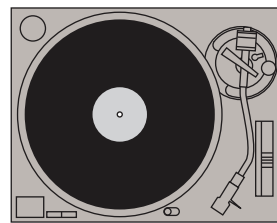

Mix up to six mics at once, wired or wireless.

Play audio from your computer via USB.

Accompany on keyboard or workstation.

Play vinyl, CD and DVD.

Play MP3s. USB power is supplied.

All these things can go in

All these things can come out

Cue any source in headphones before sending to the speakers.

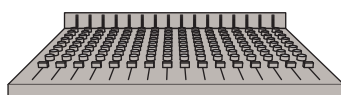

Easily make and print custom input labels.

Record audio to your computer via USB.

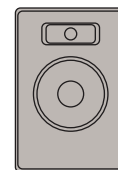

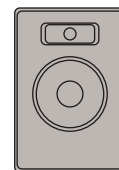

The MLM 65 acts like a USB sound card.

Use as a submixer that adds additional inputs to the main mixer.

Outputs include USB audio, S/PDIF, Toslink, and RCA.

Send the main mix to a stereo amplifier or powered speakers.

Balanced XLR Outputs are good for long cable runs.

Simple, Easy and Intuitive

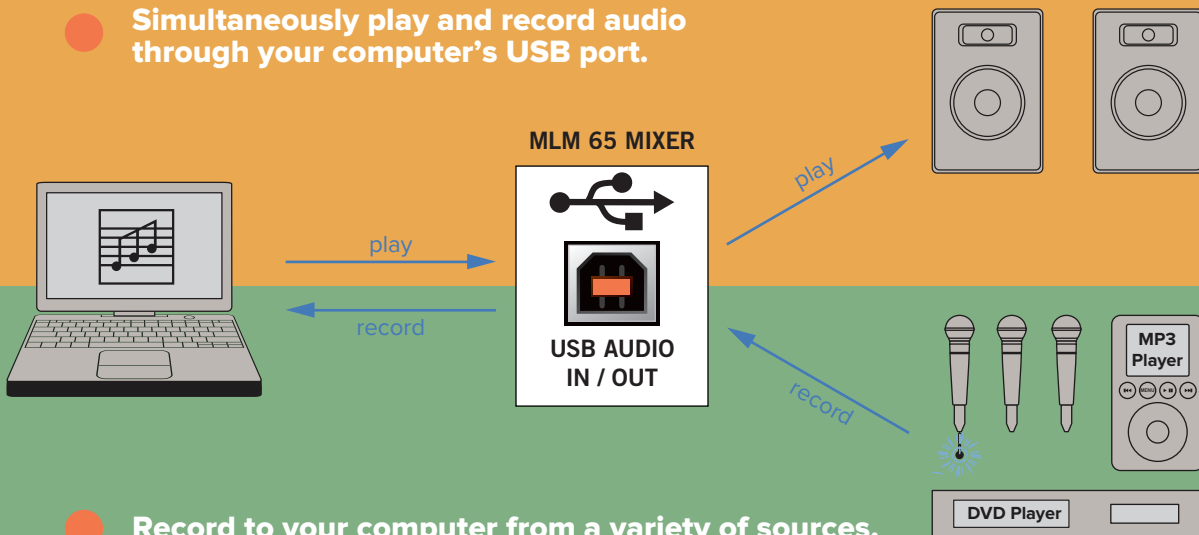

Even an adult can operate it!

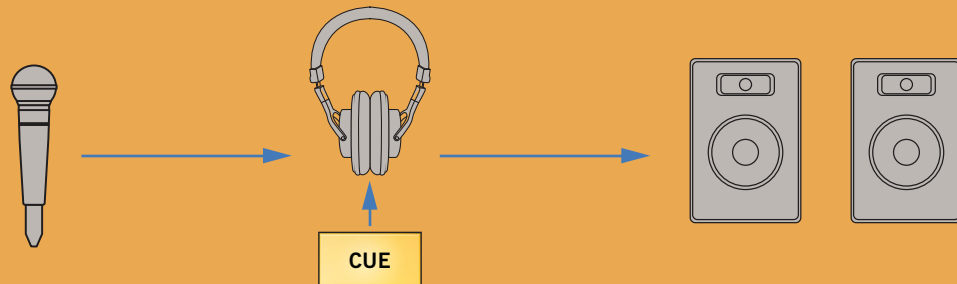

The Rane MLM 65 Mic / Line Mixer

The only non-complicated mixer that combines these features:

- Simultaneously play and record audio through your computer's USB port.

- Record to your computer from a variety of sources.

- Audition any source in headphones before the audience hears it.
